Safety Bulletin

Contractors Association of West Virginia
2114 Kanawha Boulevard, East, Charleston, West Virginia 25311 (304) 342-1166

July 7, 2017

Heavy Equipment

The primary sources of injury to operators and other personnel working around heavy equipment are:

1. Repairing and servicing equipment in dangerous positions.
2. Striking individuals or other vehicles with the equipment, particularly its blade.
3. Unexpected violent tipping of the equipment.
4. Uncontrolled traffic within or through the work area.
5. Unexpected violent shocks or jars to the machine.
6. Sudden movement of a power unit while it is being attached to earth moving equipment.
7. Limbs of trees or overhead obstructions.
8. Leaving earth moving or other equipment in dangerous positions while unattended.
9. Failure of lifting mechanisms.

General Operating Precautions:

1. Machines should be maintained in good working order. All vital parts such as motors, chassis, blades, blade holders, tracks, drives, hydraulic and pneumatic mechanisms, and transmissions should be thoroughly inspected each day.
2. Before starting a job, the operator should be given instructions regarding the work to be done.
3. Before using the starting motor, the operator should check to make sure that all operating controls are in the neutral position.
4. Machines should be operated at speeds and in a manner consistent with conditions on the particular job.
5. At no time should a piece of equipment be left unattended while the motor is running, especially if the machine is on an inclined surface or on loose material.
6. If possible, equipment should be driven entirely off the road at night. When any portion of the machine projects into the road, it should be adequately marked with red lights or flares. Red flags should be used in daytime.
7. Personnel should stop motors and refrain from smoking during refuelling operations.
8. The operator should keep deck plates or steps on equipment free from grease, oil, ice and mud. Corded soles shoes are recommended.
9. Employees, other than operator, should not ride on equipment.
10. Operators should not wear loose clothing, which can get caught in moving parts of equipment.

Contact the CAWV at 304-342-1166 for more help with your safety program.

The Associated General Contractors (AGC) of America is collaborating with ClickSafety, an OSHA-authorized provider, to deliver a wide range of construction related safety courses online for members at a 10% discount. To view the full course catalog, and for information on ordering, visit: www.cawv.org then click on the Safety link.

FUTURE OF HIGHWAY CONSTRUCTION TOPIC OF JULY 18 FORUM; NOON AT EMBASSY SUITES HOTEL

As of July 1, 2017, the WVDOH will be putting out millions in new paving, bridge and other maintenance and construction projects with the passage of S.B. 1006, the \$140 million highway funding bill. The CAWV and WVDOH are holding a forum for all CAWV contractors, subcontractors, engineers, material suppliers, equipment dealers and all other interested members on **Tuesday, July 18, at noon at Charleston Embassy Suites Hotel**. Transportation Secretary Tom Smith, his leadership team, district engineers and others will outline the WVDOH's proposals to get the projects designed and constructed, many within the next few lettings. CAWV members will have an opportunity to ask questions and to provide comments and recommendations on how to get the projects completed quickly. It is hoped many of the projects can be completed this calendar year.

Registration information was emailed to members this week. The agenda and registration form can be obtained by visiting <http://www.cawv.org/events/wv-highway-construction-forum.html>.

REBID: REPAIR SELECTED STRUCTURES, PNEUMATICALLY APPLIED MORTAR SHOTCRETE, WV PARKWAYS

Bids will be accepted until 3:00 PM on 8/3/2017 for repairing selected bridge substructure units, box culvert and underpass by pneumatically applied mortar (shotcrete) on three structures at two locations in Raleigh and Kanawha counties.
