Newsletter 2018-24

June 15, 2018

WEST VIRGINIA CONTINUES TO LEAD THE NATION IN LARGEST PERCENTAGE OF CONSTRUCTION EMPLOYMENT GROWTH

For the fourth month in a row, West Virginia continues to lead the nation with the highest percentage of new construction jobs during the past year according to a recent analysis by the Associated General Contractors of America of Labor Department data. West Virginia added the highest percentage of new construction jobs during the past year (11.1 percent, 3,400 jobs), followed by Arizona, Georgia, Michigan and Utah (7.6 percent, 7,300 jobs). Construction employment reached a record high in Louisiana, Nebraska and Texas. Forty-two states and the District of Columbia added construction jobs between May 2017 and May 2018, while 28 states added construction jobs between April and May. Association officials warned that rising costs for many construction materials are likely to undermine future employment growth in the sector. They noted that contractors will have a hard time passing the additional costs along to their clients, leaving less money available to invest in new personnel or equipment. Officials also urged administration officials to reconsider imposing new tariffs that are likely to undermine economic growth.

For the past number of years, West Virginia has ranked last or next to last in construction employment. The ranking correlates with increased construction activity in highway and bridge, oil and gas, coal operations, manufacturing, as well as the multi-state pipeline projects. February figures showed the state had a 14.3 percent increase with 4,300 jobs added, March figures showed an 11.2 percent increase with 3,400 jobs, and April showed an increase of 11.6 percent with 3,500 jobs. Members can click the links to view the state employment data by [rank](#), [state](#) and [peak](#). View the state employment [map](#).

Other economic indicators are also increasing in the state. Workforce West Virginia recently released employment numbers for the month of May, and the numbers are strong. Data released compares May 2018 with May 2017. During that period, total employment rose by 6,000 jobs, while the civilian labor force grew by 9,700. Here are some of the highlights of the report:

- Total Nonfarm Payroll Employment is at 760,300 jobs - a net gain of 17,100 jobs
- Total Employment is at 743,500 - net gain of 6,000
- Mining & Logging is at 22,800 - net gain of 1,100
- Manufacturing is at 47,100 - net gain of 500
- Construction is at 33,900 - net gain of 3,400
- Educational & Health Services is at 131,500 - net gain of 1,800

WEST VIRGINIA'S FUTURE ECONOMIC OUTLOOK TOPIC OF CAWV ANNUAL MEETING

With the increase in West Virginia's construction employment and the state's economy starting to rebound, the association wants to give members a better understanding of the state's future

economic outlook. In February, March, April, and now May, West Virginia lead the nation in the highest percent of new construction jobs over the last year. CAWV members attending the CAWV Annual Meeting, July 12-15 at The Greenbrier, will hear from Dr. John Deskins Ph.D., the Director of the Bureau of Business & Economic Research at West Virginia University. Dr. Deskins will be the keynote speaker at the Saturday morning General Business Session. Also added to the annual meeting program is West Virginia Transportation Secretary and Division of Highways Commissioner Tom Smith, who will speak at Saturday's Highway/Heavy Division meeting following the General Business Session. The deadline to register for this year's Annual Meeting is Monday, July 9, but we encourage members to register immediately as rooms are almost sold out. Members can obtain both meeting and room reservation forms online at <http://www.cawv.org/events/annual-meeting.html>.

CONSTRUCTION COSTS SOAR IN MAY, OUTPACING CONTRACTORS' PRICING; NEW TARIFFS THREATEN TO WORSEN COST SQUEEZE, LEAD TO PROJECT DELAYS

Construction costs accelerated again in May, with steep increases for a wide range of building and road materials, including many that are subject to tariffs that could drive prices still higher, according to an analysis by the Associated General Contractors of America of new Labor Department data. Association officials say that the construction industry will bear a heavy share of the tariffs' costs. Prices jumped at double-digit annual rates for metals, lumber and plywood, and diesel fuel, while ready-mixed concrete, asphalt paving and roofing materials also had unusually large increases, according to AGC chief economist, Ken Simonson. "The cost of all goods used in construction rose 8.8 percent from May 2017 to May 2018, the steepest annual increase in nearly seven years," said Simonson.

From May 2017 to May 2018, the producer price index jumped by 17.3 percent for aluminum mill shapes, 13.9 percent for lumber and plywood, 13.8 percent for copper and brass mill shapes and 10.5 percent for steel mill products. Other construction inputs that rose sharply in price from May 2017 to May 2018 include diesel fuel, 44.5 percent; asphalt felts and coatings, 8.9 percent; ready-mixed concrete, 6.5 percent; and paving mixtures and blocks, 5.2 percent.

The U.S. imposed steel and aluminum tariffs on imports from Canada, Mexico and the European Union on May 31. The impact from these tariffs is not reflected yet in the most recent data. Simonson says the increases far outstrip the 4.2 percent rise in the price index for new construction, and it implies that contractors are facing a severe squeeze on costs for both ongoing and new projects. He also indicated that the tariffs imposed on steel and aluminum since this data was collected in mid-May are likely to drive contractors' costs still higher.

The producer price index for inputs to construction industries, goods—a measure of all materials used in construction projects including items consumed by contractors, such as concrete products—rose 2.2 percent in May alone and 8.8 percent over 12 months. The year-over-year increase was the steepest since July 2011, the economist noted.

Even before they have taken effect, construction officials said the tariffs have triggered a surge of orders that mills say exceeds their current capacity, a situation that threatens to produce construction delays, budget problems and possibly cancellations for future construction projects.

"Considering the impact the mere threat of tariffs have had on materials prices and demand, prices are likely to increase further as the new trade restrictions come online," said Stephen E. Sandherr, the association's chief executive officer. "Forcing contractors to pay more for materials and wait longer to receive them will make construction more costly and slower."

Members can [click here](#) to view the recent producer price indexes for construction. This week Senate Republicans blocked consideration of the AGC supported bipartisan legislation, see this week's Building Bulletin for more information.

WVDOH PUBLIC LETTING RESULTS - LISTEN LIVE

The CAWV strives to provide our members with important, up-to-date information. We are pleased to offer members the latest highway letting results along with our weekly Newsletter. A letting schedule is available on the CAWV Schedule of Events bulletin. The Asphalt Pavement Association of West Virginia, a division of CAWV, is pleased to host live internet broadcasts of West Virginia Department of Highways' public lettings, sponsored by Daniels Law Firm of Charleston. The lettings are available in webinar format (with video and audio) or by a call-in number. [Click here to listen live](#). See the latest highway letting results attached to this week's Highway / Heavy bulletin, or view online by [clicking here](#).

2018-2019 BOARD OF DIRECTORS BALLOTS SENT TO CONTRACTOR MEMBERS

Contractor members received last week an official ballot for election of officers and directors of the CAWV for 2018-2019. For each office, the nominee with the largest vote will be declared elected at the association's General Business Session at the Annual Meeting, July 12-15, at The Greenbrier, White Sulphur Springs. CAWV Nominating Committee Chairman C.R. Neighborgall asks contractor members to mark and return their ballot to the CAWV office by July 7, 2018.

LAST CALL FOR LISTING VERIFICATION FOR CAWV MEMBERSHIP DIRECTORY

The CAWV is finalizing all member information for the upcoming Membership Directory and Buyers Guide. Members received by mail and email their listing for the upcoming directory. Please return your listing letter **IMMEDIATELY**, or verify your company information, as this is the last call for changes to be made. Members that do not respond will have their company information printed as is and will risk having incorrect information published in the directory. Please contact Cassidy Webb at (304) 342-1166 or email cwebb@cawv.org for more information.

SCHOOL BUILDING AUTHORITY ANNOUNCES STAFF CHANGES THIS WEEK

The School Building Authority of West Virginia made two personnel moves at a short meeting this week. The authority promoted Ben Ashley to director of architectural services after a short term as interim director. Ashley is replacing Scott Raines, who resigned effective April 30 after over a dozen years on the SBA staff. Angie Bradley, formally senior technical assistant, was also promoted to architectural services coordinator. At this week's meeting, the SBA approved the hiring of Sue Chapman as its new finance director. Chapman, who has worked in the state Department of Education and the Arts, will replace longtime SBA Finance Director Garry Stewart. Stewart is retiring on June 30 after nearly 28 years with the SBA. Members can read more on the authority's staff changes, including the new Executive Director David Roach, in the upcoming May/June issue of *West Virginia Construction News*.

BIPARTISAN BILL TO ADDRESS STEEL & ALUMINUM TARIFFS BLOCKED - CONSTRUCTION MATERIALS COSTS ON THE RISE

On June 12, Senate Republicans blocked consideration of AGC-supported bipartisan legislation that would require congressional approval of tariffs imposed for national security purposes, including both the 25 percent tariff on steel and 10 percent tariff on aluminum. This comes on the heels of producer price index figures showing, from May 2017 to May 2018, a jump of 17.3 percent for aluminum mill shapes and 10.5 percent for steel mill products. The U.S. imposed steel and aluminum tariffs on imports from Canada, Mexico and the European Union on June 1 and are not reflected in the current data. Members can contact the president and members of Congress to tell them to end steel and aluminum tariffs hurting construction businesses [by clicking here](#).

LIGHTNING SAFETY - MYTHS AND FACTS

Working outside during a storm can be dangerous. How well do you know the dangers of lightning? Check your knowledge against these lightning myths courtesy of NOAA.

Myth: Lightning never strikes the same place twice.

Fact: Lightning often strikes the same place repeatedly, especially if it's a tall, pointy, isolated object. The Empire State Building is hit nearly 100 times a year.

Myth: If it's not raining or there aren't clouds overhead, you're safe from lightning.

Fact: Lightning often strikes more than three miles from the center of the thunderstorm, far outside the rain or thunderstorm cloud. "Bolts from the blue" can strike 10-15 miles from the thunderstorm.

Myth: Rubber tires on a car protect you from lightning by insulating you from the ground.

Fact: Most cars are safe from lightning, but it is the metal roof and metal sides that protect you, NOT the rubber tires. Remember, convertibles, motorcycles, bicycles, open-shelled outdoor recreational vehicles and cars with fiberglass shells offer no protection from lightning. When lightning strikes a vehicle, it goes through the metal frame into the ground. Don't lean on doors during a thunderstorm.

Myth: A lightning victim is electrified. If you touch them, you'll be electrocuted.

Fact: The human body does not store electricity. It is perfectly safe to touch a lightning victim to give them first aid. This is the most chilling of lightning Myths. Imagine if someone died because people were afraid to give CPR!

Myth: If outside in a thunderstorm, you should seek shelter under a tree to stay dry.

Fact: Being underneath a tree is the second leading cause of lightning casualties. Better to get wet than fried!

Myth: If you are in a house, you are 100% safe from lightning.

Fact: A house is a safe place to be during a thunderstorm as long as you avoid anything that conducts electricity. This means staying off corded phones, electrical appliances, wires, TV cables, computers, plumbing, metal doors and windows. Windows are hazardous for two reasons: wind generated during a thunderstorm can blow objects into the window, breaking it and causing glass to shatter and second, in older homes, in rare instances, lightning can come in cracks in the sides of windows.

Myth: If trapped outside and lightning is about to strike, I should lie flat on the ground.

Fact: Lying flat increases your chance of being affected by potentially deadly ground current. If you are caught outside in a thunderstorm, you keep moving toward a safe shelter.

Contact the CAWV at (304)342-1166 for assistance with your safety program.

The Associated General Contractors (AGC) of America is collaborating with ClickSafety, an OSHA-authorized provider, to deliver a wide range of construction related safety courses online for members at a 10% discount. COURT BLOCKS ENFORCEMENT OF 2015 WOTUS RULE; TWENTY-FOUR STATES NOW HAVE INJUNCTION

As the Trump Administration faces the long task to “repeal and replace” the 2015 Waters of the United States (WOTUS) rule, district courts have become the latest battleground. On June 8, the U.S. District Court for the Southern District of Georgia issued an injunction on the 2015 rule, effectively shielding 11 states as their challenge of the rule moves through the court. An existing injunction has been in place since 2015 covering 13 other states, bringing the total number of states protected by an injunction to twenty-four. District courts are also handling requests for injunctions in Ohio and Texas. Meanwhile, environmental groups filed a lawsuit in the Northern District of California on June 13 (joining cases in New York and South Carolina) to challenge the administration’s recent rule to delay applicability of the 2015 rule by two years. Although the 2015 rule currently remains delayed until 2020; these injunctions add a backstop should the cases against the delay rule prevail.

CAPITO, MANCHIN ANNOUNCE FUNDING FOR WASTEWATER INFRASTRUCTURE FOR THE CITY OF PETERSBURG AND ENERGY EFFICIENCY FOR SMALL BUSINESSES

U.S. Senators Shelley Moore Capito (R-W.Va.) and Joe Manchin (D-W.Va.), members of the Senate Appropriations Committee, announced \$738,638 for West Virginia from the U.S. Department of Agriculture's Office of Rural Development. Funding will support improvements to the City of Petersburg's wastewater treatment plant, allowing the city to better serve its more than 1,200 sewer customers, and energy efficiency projects for two West Virginian small businesses. "Our rural infrastructure is crucial to ensuring economic success and business development in our West Virginia communities. The impacts of these investments in the wastewater treatment plant in Petersburg, energy efficiency for the Family Adventure Resort in Harpers Ferry and solar panels for Thankful Valley Farms and Hatchery, LLC in Leon will be felt across our state. As a member of the Senate Appropriations Committee, I will continue advocating for investments in West Virginia's rural infrastructure projects," Senator Manchin said.

USDOT TO PROVIDE NEARLY \$14 MILLION TO WV AIRPORTS

The U.S. Department of Transportation will give nearly \$14 million to airports in West Virginia to use for improvement projects. The funding was revealed Wednesday in a joint announcement made by West Virginia's U.S. Senators, Joe Manchin, D-W.Va., and Shelley Moore Capito, R-W.Va. The funds will support projects of the Central West Virginia Regional Airport Authority, Raleigh County Airport Authority, Greenbrier County Airport Authority and Mercer County Airport Authority.

The awarded funds and projects they will be supporting are:

- \$5,052,607 to the Central West Virginia Regional Airport Authority for a project for Yeager Airport's runway safety area.
- \$3,850,000 to the Raleigh County Airport Authority for runway rehabilitation.
- \$3,678,409 to the Greenbrier County Airport Authority for projects involving apron rehabilitation and airport beacon installations.
- \$1,393,720 to the Mercer County Airport Authority for runway rehabilitation.
